

Restaurant SOP Bot - Sample SOP Document

This SOP document is designed for the PRJ-046 Restaurant SOP Bot project. It includes hygiene procedures, kitchen workflows, service-process SOPs, role-based access examples, and AI integration notes for testing your RAG chatbot.

Document Information

Document Version: 1.0

Effective Date: May 10, 2026

Confidentiality: Internal Use Only

Section 1: Hygiene and Sanitation

Applicable Roles: ALL STAFF (Front-of-House and Back-of-House)

1.1 Personal Hygiene

- All employees must wash their hands with warm water and antibacterial soap for at least 20 seconds before starting their shift.
- Hairnets or chef hats are mandatory for all kitchen staff.
- Front-of-house staff with long hair must keep it tied back.
- Nails must be kept short and clean.
- Artificial nails and nail polish are prohibited for food handlers.

1.2 Surface Sanitization

- Food preparation surfaces must be sanitized every 2 hours.
- Dining tables must be sanitized after each guest leaves.
- Restrooms must be checked and cleaned every 60 minutes during operating hours.

Section 2: Kitchen Workflow

Applicable Roles: BACK-OF-HOUSE (Chefs, Line Cooks, Prep Staff, Dishwashers)

2.1 Opening Procedures

- Line cooks must arrive 90 minutes before opening.
- FIFO method must be followed for all ingredients.

2.2 Food Safety and Temperature Logs

- Cold foods must be stored below 4°C (40°F).
- Hot foods must be held above 60°C (140°F).
- Poultry must reach 74°C (165°F).
- Ground meat must reach 71°C (160°F).
- Refrigerator temperatures must be logged at 10:00 AM, 3:00 PM, and 9:00 PM.

2.3 Closing Procedures

- Fryers must be turned off and covered.
- Fryer oil must be filtered every two days.
- Cutting boards must be cleaned using the industrial dishwasher.

Section 3: Service Process SOP

Applicable Roles: FRONT-OF-HOUSE (Hosts, Servers, Bartenders, Bussers)

3.1 Guest Greeting and Seating

- Guests must be greeted within 30 seconds of entering the restaurant.
- Hosts should provide accurate wait-time estimates.

3.2 Order Taking and Dietary Restrictions

- Servers must approach new tables within 2 minutes.
- Allergy information must be clearly marked as "ALLERGY".
- The kitchen expeditor must be informed before processing the order.

3.3 Handling Complaints

- Staff must use the L.E.A.R.N method:
Listen, Empathize, Apologize, React, Notify.
- Minor complaints may receive complimentary desserts or beverages.
- Severe complaints must be escalated to the Floor Manager.

Role-Based Access Examples

Server Role:

Access allowed for guest service, allergy procedures, complaint handling.

Kitchen Staff Role:

Access allowed for food safety, temperature logs, opening/closing kitchen procedures.

Manager Role:

Full access to all SOP sections and version history.

Sample Questions for Testing Your Chatbot

- What temperature should poultry be cooked to?
- What is the allergy protocol?
- What are the closing procedures for fryers?
- How often should restrooms be cleaned?
- What does the L.E.A.R.N method stand for?

API Key and RAG Workflow Notes

Your Restaurant SOP Bot uses Retrieval-Augmented Generation (RAG).

Workflow:

1. Upload this PDF document.
2. LangChain loads and splits the document into chunks.
3. Embeddings are generated using your API key.
4. Chunks are stored in FAISS or Chroma vector database.
5. User questions are matched against the vector database.
6. Retrieved content is sent to the LLM for answer generation.

Important:

Never hardcode API keys in your source code.
Store keys securely in a .env file.

Example:
LLM_API_KEY=your_actual_api_key_here

Project Feature Summary

Feature	Purpose
Role-based Access	Restrict SOP access by employee role
Cited Answers	Show section source for chatbot answers
Vector Database	Store embeddings for semantic search
Feedback System	Collect answer quality feedback
